How to get BioSight-ID™ activated for your BioSig-ID™ protected Quiz in Blackboard

ONLY NEEDED FOR ONLINE TESTS IN BLACKBOARD!

What is BioSight-ID?
BioSight-ID records a blurred session of student taking a test-assessment (exam).

Why add BioSight-ID?
It is used to identify instances of cheating on tests. For information on reviewing the BioSight-ID activity in a course with existing activity please see: https://setup.biosig-id.com/portal/en/kb/articles/biosight-id-dashboard

How to activate BioSight-ID in your course
Biosight is activated automatically based on the primary name of the instructor name teaching the course. If you wish to have BioSight active in your courses, please email ron.kerkenaar@biosig-id.com and rachel.lane@biosig-id.com. You only need to request this once and BioSight will be active in all of your future courses.

Once Biosight is activated, you will need to verify that each quiz/exam is BioSig-ID enabled.

To test the system, click on the BEGIN button for any exam that has the "BioSig-ID™ Options (Enabled)" active, and the BioSight-ID™ instructions will appear.
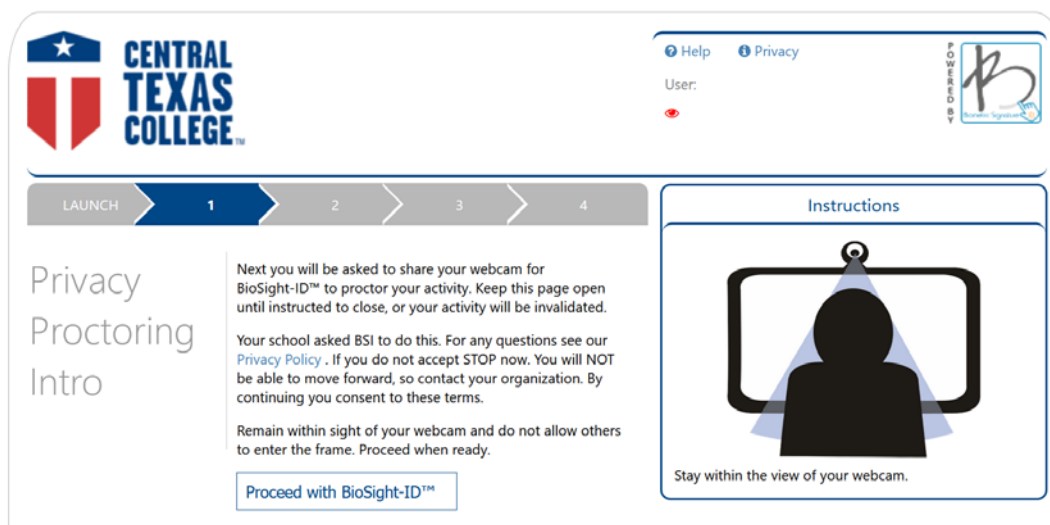

If you do not wish to use BioSig and BioSight on any quiz/exam, please adjust the chevron option to Disabled. Turn BioSig-ID™ off for that quiz or exam and that will inherently disable the BioSight-ID™ feature.

How to get BioSight-ID™ activated for your BioSig-ID™ protected Quiz in Blackboard

If you wish to use only BioSig but not BioSight on a quiz or exam, you will need to create a BioSig-ID™ tool-instance and apply BioSig on a quiz or exam using Adaptive Release rule.
Here's now:

1. Navigate to where the quiz or exam is located.

2. Click "Tools" and select "Biometric Signature ID".

3. Enter the name and description, then click Submit:

BioSig-ID instance will look like this:

4. Click the chevron next to the quiz/exam to ensure that BioSig-ID option is 'Disabled':
5. To apply the BioSig instance to the quiz/exam using the Adaptive Release tool, click the chevron and select "Adaptive Release":
6. Select the BioSig-ID instance you previously created, then click Submit. The quiz/test is now BioSig active.

If there is a need for a more complex configuration for any courses (example: courses preferred NOT to use the BioSight-ID™ feature on exams while retaining BioSig-ID™ on the BEGIN button), contact CTC Blackboard Tech Support at de.techsupport@ctcd.edu.
